

CONSTELLATION HOME ELECTRONICS

Distributed Audio and Media System | Santa Fe, NM

Over the last decade, Constellation Home Electronics has grown and evolved from a small consulting and design firm to become the premier electronics retail and service business in New Mexico. Distinguished by the best brands, the best people, and the best service, Constellation ensures the same attention to detail regardless of project size. This particular client commissioned a state-of-the-art system both indoors and out. The indoor audio system has six independent keypad controlled zones while the outdoor pool area features a distributed audio system with wireless control, eight garden speakers, dedicated, in-ground hidden sub-woofer, and fully wired pool house with Internet and system feeds. Inside, Constellation installed a 65" flat-panel 1080p wall mounted television controlled by programmed remote, hidden electronics rack system to hold all components, and 5.1 surround sound with in-wall mounted speakers. Simply put, this house rocks!
